PROFILE

Full-stack software developer with experience building web and desktop applications using modern frameworks such as React, Astro, Node.js, and the MERN stack. Skilled in frontend development, backend APIs, database management, and responsive UI design. Experienced in building scalable applications, improving performance, and deploying production-ready systems.

EDUCATION

APJ Abdul Kalam Technological University | GPA - 7.44/10

07/2020 – 07/2024 | Kerala, India

Bachelor of Technology, Computer Science and Engineering

PROFESSIONAL EXPERIENCE

Software Developer

05/2025 – 11/2025 | Kochi, India

Facein Technologies Pvt. Ltd.

- Built responsive, SEO-friendly websites using Astro.js, Tailwind CSS, and modern UI component libraries, improving performance through Astro's static rendering.
- Streamlined website deployment and domain management by connecting GitHub with Hostinger, reducing manual release steps through automated workflows.
- Developed and launched multiple production-ready websites using modern frameworks, including the company's official website, with a focus on scalability and SEO performance.
- Collaborated with teams to deliver responsive, high-performance web solutions through code reviews, planning, and iterative development.

Full Stack Developer (MERN) – Training Program

10/2024 – 05/2025 | Calicut, India

Luminar Technolab

- Built and deployed full-stack web applications using MongoDB, Express.js, React, and Node.js with RESTful API integration and JWT-based authentication.
- Enhanced application performance through debugging, code refactoring, and database query optimization, improving overall response time.
- Applied modern front-end practices including responsive design, Bootstrap layouts, and component-driven architecture to increase user engagement.

SKILLS

Languages — JavaScript (ES6+), TypeScript, C, SQL (MySQL)

Technologies / Frameworks — HTML, CSS, React.js, Express.js, Node.js, MongoDB, Anime.js, Astro.js, React Native, Visual Studio Code, GitHub

PROJECTS

Yigalia Biotics - Pharmaceutical Company Website | Astro, React, JavaScript, TypeScript, HTML5, CSS, EmailJS

- Designed and developed a fully responsive pharmaceutical company website using Astro and React, with a clean UI and strong cross-device compatibility - [yigalia.in](#) .
- Integrated EmailJS to handle contact form submissions without a backend server, keeping the setup simple and reliable.
- Used Astro's static site generation with React components to improve performance and support fast page loading.
- Built the website with a strong focus on SEO, usability, and a professional brand presence.

Boundless Travelogues Website | Astro, React, JavaScript, TypeScript, HTML5, CSS3, Three.js, Anime.js, GSAP

- Built a fully responsive, SEO-optimized travel packages website using Astro and React with a component-based architecture, achieving high Lighthouse performance scores through lazy loading, image optimization, and code splitting.
- Implemented interactive 3D destination visuals using Three.js and smooth scroll-based animations via GSAP to significantly boost user engagement and time-on-page - [boundlesstravelogues.com](#) .
- Architected scalable front-end features with TypeScript for type safety, ensuring maintainable and bug-resistant code across all dynamic content modules.

ScriptEase - Script Writing Tool | React, MongoDB, Express.js, Node.js, GSAP

- Developing a full-stack web application for screenplay writing and pre-production, focused on structured content creation and project workflow management.
- Implementing core features for script writing, synopsis development, and organized scene handling with industry-standard formatting.
- Incorporating pre-production functionalities such as content organization, scheduling concepts, and production flow control.
- Continuously enhancing the platform by expanding features and improving usability as part of an ongoing development process.

ACHIEVEMENT

Presented final-year research at the 6th International Conference on Computational Intelligence and Digital Technology (ICCIDT), hosted by Mangalam College of Engineering, Kottayam. This engagement highlighted expertise in emerging technological solutions and the effective delivery of academic research.
