Professional Summary

Results-driven Full-Stack Developer with 1+ year of professional experience building scalable web and mobile applications using the MERN stack (MongoDB, Express.js, React.js, Node.js) and React Native (Expo). Proven ability to deliver high-performance, SEO-optimized, and user-centric digital products from concept to production. Experienced in Agile development environments, RESTful API integration, cross-platform UI/UX design, and front-end performance optimization.

Experience

Software Developer

05/2025 – 11/2025 | Kochi, India

Facein Technologies Pvt. Ltd.

- Developed and deployed multiple production-grade, modern framework-based websites including the company's official web presence, with a strong focus on scalability, SEO optimization, and Core Web Vitals performance.
- Designed intuitive, cross-platform mobile application UI/UX using React Native (Expo), delivering seamless user experiences across iOS and Android platforms.
- Collaborated with cross-functional teams in an Agile/Scrum environment, contributing to sprint planning, code reviews, and iterative delivery of responsive, high-performance web solutions.
- Optimized website scalability and reliability by managing server deployment with PM2, and improved overall application performance through systematic debugging, code refactoring, and asset optimization, ensuring zero-downtime production uptime and smooth user experiences across all deployments.

ME(A)RN Stack Intern

10/2024 – 05/2025 | Calicut, India

Luminar Technolab

- Built and deployed full-stack web applications using MongoDB, Express.js, React.js, and Node.js with RESTful API integration and JWT-based authentication.
- Enhanced application performance through debugging, code refactoring, and database query optimization, improving overall response time.
- Applied modern front-end practices including responsive design, Bootstrap layouts, and component-driven architecture to increase user engagement.

Projects

Vigalia Biotics — Pharmaceutical Company Website | Astro, React, JavaScript, TypeScript, HTML5, CSS, EmailJS

- Designed and developed a professional, fully responsive pharmaceutical company website using Astro and React, with a focus on brand credibility, clean UI, and cross-device compatibility.
- Integrated EmailJS to enable seamless client-side contact form functionality without a backend server, reducing infrastructure complexity while maintaining reliable email delivery.
- Leveraged Astro's static site generation with React component islands for optimal performance, achieving fast page load times and strong SEO foundations critical for healthcare industry visibility.

Boundless Travelogues Website | Astro, React, JavaScript, TypeScript, HTML5, CSS3, Three.js, Anime.js, GSAP

- Built a fully responsive, SEO-optimized travel packages website using Astro and React with a component-based architecture, achieving high Lighthouse performance scores through lazy loading, image optimization, and code splitting.
- Implemented interactive 3D destination visuals using Three.js and smooth scroll-based animations via GSAP to significantly boost user engagement and time-on-page.
- Architected scalable front-end features with TypeScript for type safety, ensuring maintainable and bug-resistant code across all dynamic content modules.

Full-Stack Project | MERN Stack | JavaScript, MongoDB, Express.js, React, Node.js

- Designed and developed an end-to-end MERN-based gaming platform supporting user registration, login, and profile management with JWT authentication.
- Implemented specialized game scheduling logic for timed 1-minute sessions including pause/resume functionality and paid continuation via integrated payment gateway.
- Built a comprehensive admin dashboard with CRUD operations for game catalog management, user account administration, and payment tracking.

Skills

Languages — JavaScript (ES6+), TypeScript, C, SQL (MySQL)

Frontend — React.js, React Native (Expo), HTML5, CSS3, Bootstrap, Astro, Three.js, GSAP, Anime.js

Backend — Node.js, Express.js

Database — MongoDB, MySQL, Supabase

Tools & Platforms — Git, GitHub, VS Code, Postman, AI-Assisted Development

Concepts — RESTful APIs, JWT Authentication, Agile/Scrum, Responsive Design, SEO Optimization, Performance Optimization, Cross-Platform Development

Education

APJ Abdul Kalam Technological University | GPA - 7.44/10

07/2020 – 07/2024 | Kerala, India

Bachelor of Technology, Computer Science and Engineering

Achievement

Presented a final-year research project at the 6th International Conference on Computational Intelligence and Digital Technology (ICCIDT), hosted by Mangalam College of Engineering, Kottayam, Kerala — demonstrating expertise in emerging technology solutions and academic research communication.
